
Education:

Drexel University

Bachelor of Science in Information Systems

Philadelphia, PA
Graduation: June 2003

Certification

Microsoft Certified Professional (MCP 70-100): Analyzing Requirements and Defining Solutions Architectures
Certified Novell Administrator

2-2002
3-1998

Experience:

Tallan Inc (<http://www.tallan.com>)

Senior Software Consultant

New York, NY
8-2010 to Present

- Trained and helped develop an office from less than 10 developers to more than 35 working on multiple projects.
- Developed and managed multiple teams creating high-end business intelligence and forecasting solutions for pricing and promotions for commercial products.
- Developed and managed an enterprise service oriented application for processing workflows, commonly including PDF document creation.
- Developed a Silverlight 4 based Templating engine using Prism and MVVM hosted in an ASP.NET web application with WCF enabled services.
- Implemented and assisted in the creation of a User Experience redesign for two Silverlight projects, created Framework level controls and styles for consumption by a large development team, and customized stylization of various Telerik Controls.

twentysix New York (acquired by Tallan) (<http://www.26ny.com>)

Senior Software Developer

New York, NY
11-2008 to 8-2010

- Architected and developed a scheduling website which provided self service customer access to an internal WinForms application.
- Architected, designed, developed, and documented a WCF Mashup project using the REST Starter Kit and jQuery. (<http://code.msdn.microsoft.com/litwaremashup>)
- Contributed to the Apache Stonehenge project proving interoperability of WS-* Specifications.
- Developed a Silverlight and WCF RIA Services best practices sample application with documentation and best practices guide.

Scientiae, LLC (<http://www.scientiae.com>)

Vice President, Interactive Technologies

New York, NY
1-2004 to 11-2008

- Managed, trained, and interviewed multiple teams of production, development and design employees and freelancers.
- Designed, setup, relocated, and maintained Windows 2003 AD, Database, Web, Email and File Servers.
- Created distributable training CD-ROMs and DVDs with video, glossary, and reference materials using Flash. (Pathways, ONE-UP).
- Created multiple custom content management and promotional ASP.NET and Flash websites. (Scientiae, ECSN, Linx, Lovaza Consult/Speaker, LinxPubs).
- Created multithreaded WinForms.NET applications that managed web content, authentication, and authorization.
- Supervised and trained production staff in designing and large scale printing of trade show pieces.

KPMG, LLP (<http://www.kpmg.com>)

Database Administrator/ Programmer

Montvale, NJ
8-2003 to 1-2004

- Designed and Implemented an Oracle Database for computing and housing multiple transfer pricing analyzes.
- Developed an application for importing financial data in multiple file formats using ASP.NET and Oracle.

Refinery Inc (<http://www.refinery.com>)

Web Programmer Co-op

Huntington Valley, PA
4-2002 to 10-2002

- Created the back-end administrative tools for a multi-lingual corporate content management system for Shimano Corporate (<http://corporate.shimano.com>) using ASP, SQL Server and VB6 COM objects.
- Launched a new Search Engine Optimization service; analyzed possible keywords for the company, compared them to their competitors, registered the company with search engines; tracked the results over a 3 month time span.
- Conducted maintenance of multiple sites such as Winterthur (<http://www.winterthur.org>).

OneBeacon Insurance (<http://www.onebeacon.com>)

Programmer/Analyst Co-op

Philadelphia, PA
4-2001 to 10-2001

- Merged data from a variety of business applications into one central system to improve data analysis and efficiency.
- Trained supervisor in Visual Basic Classes/Modules, XML, XSLT, HTML and SQL.

- Automated database entry position using web applications.
- Developed an Interactive Customer Service Request Tracking System (<http://www2.ipipeline.com/iService>).
